NURSE PRACTITIONER · MEDICAL DIRECTOR

Christine provides medical oversight of our injectable and medical treatments, from protocols and safety standards to treatment plans, so every service meets a medical standard of care.

Why clients *trust* us

INJECTABLES AT VIMI

i

A medical team

Injectables at Vimi are performed only by a registered nurse, under the oversight of a nurse practitioner.

ii

Consultation first

Every plan begins with a full assessment of your features, skin and medical history. No pressure, ever.

iii

Natural by design

We begin conservatively. The goal is to look rested and refreshed, never “done”.

iv

Care after your visit

You leave with written aftercare, and our team is a phone call away if you have any questions.

02 Laser & Light

PrimeLase, Aerolase Neo & Era and Venus Viva MD. Designed for every skin tone.

Laser Hair Removal · PrimeLase

PRICE PER SESSION

PrimeLase blends three laser wavelengths in one pass to target hair at different depths, for fast, comfortable sessions. Package prices are per session. Packages of 10 include 2 complimentary sessions, packages of 15 include 3 (Hands and Feet packages of 15 include 2; Full Body packages of 10 include 1 and of 15 include 2). Most clients need 8 to 12 sessions.

Designed for *every* skin tone

We match the laser and settings to your skin type and hair, from the fairest to the deepest skin tones (types I to VI). A patch test may be recommended before your first session.

i

Shave the day before

Shave the area 24 hours before your session. Don't wax, pluck or thread for four weeks before.

ii

Skip the tan

Avoid sun, tanning beds and self-tanner on the area. Wear SPF 30+ every day.

iii

Stay consistent

Book every session in your series on schedule for the best long-term reduction.

Deluxe RF + Esthemax OxyGeneo Transformation Adds radiofrequency for firmer-looking skin	\$300

How OxyGeneo *oxygenates* · the Bohr effect

- 1**
CO₂ bubbles
The OxyPod gel releases tiny CO₂ bubbles on the skin.
- 2**
→Your skin responds
Sensing CO₂, the body sends more blood to the area.
- 3**
→Oxygen released
Where CO₂ is higher, haemoglobin lets go of more oxygen (the Bohr effect).
- 4**
→Fresh, glowing skin
Better circulation and oxygen leave skin brighter and more radiant.

Mechanism as described by the manufacturer. Individual results vary.

What to *expect*

COOLSCULPTING

i

Your session

An applicator gently cools the area. You may feel cold and pulling at first, then numbness. Most clients read or relax.

ii

Afterwards

Return to your day. Temporary redness, swelling, tingling or numbness in the area is common.

iii

Your results

Changes appear gradually, typically over 1 to 3 months. Some areas benefit from a second session.
